

# Copilot Optimisation Assessment

## Supercharge your organisations collaboration and productivity with M365 Copilot

Microsoft Copilot is an innovative solution that is seamlessly integrated into the renowned Microsoft platform, leveraging the power of AI across every application within the suite. With Copilot, users gain access to a digital assistant designed to enhance workflow efficiency and boost productivity. By combining cutting-edge LLMs with your company's unique content and context, Copilot empowers users to work smarter and achieve more within the familiar Microsoft environment.

Spanish Point have been chosen as one of only two partners in Ireland for the prestigious Speed - Up Copilot M365 Copilot Program, and we look forward to bringing the advantages it offers to our valued customers.

## What's covered – Spanish Point Intranets

### Copilot Assessment

During the initial stages of our collaboration, we conduct a comprehensive assessment of your Copilot technical readiness. We will assess your current infrastructure and processes to ensure smooth integration and utilisation.

### Optimisation Workshop

A one-day workshop with a Spanish Point senior practice lead. Throughout the session, we'll dive into key topics including prompt engineering strategies, practical insights for optimising productivity within Microsoft 365 applications, and seamlessly integrating your own data into the Copilot model. Additionally, we will look at security and governance measures, leveraging tools like Purview to ensure data integrity and compliance.

### Deployment Support

We will assist you in the launch of the Copilot Program offering guidance, best practices to optimise deployment workflows, minimise downtime, and maximise system reliability.

Supercharge your organisations collaboration and productivity with M365 Copilot
